

WITNESS STATEMENT

Witness: Guenther Steiner, Team Principal

EXAMINATION

I hereby state that on the morning of the race I personally reviewed the pre-race engineering report. The gearbox was declared fit for competition by our chief engineer. I was not aware of any anomaly at the time of race start.

CROSS EXAMINATION

When pressed on the telemetry data I confirmed that the engineering team did flag a minor irregularity on lap 3 but we assessed it as within acceptable tolerance. The driver was not informed because we did not consider it a safety risk at that point.

RE-EXAMINATION

I stand by my earlier statement. The driver had no knowledge of the gearbox irregularity until the failure on lap 12. The decision not to inform the driver was made collectively by the engineering team.
